HOTDOG DRIVE

On the first Thursday of every month, staff volunteer their mornings to make hot dogs for the underprivileged via an organization called: Connected Durban.

HERITAGE DAY 2021

A colourful celebration of Diversity & Unity was held by the Hanslab team.

NEW STAFF

Hanslab welcomed Sphelele Cele to the team earlier this year. He is currently involved in ECO Auditing.

OUR SERVICES

ENVIRONMENTAL COMPLIANCE MONITORING

An Environmental Compliance Audit is undertaken to verify that a development is being established in line with the conditions within its Environmental Authorisation(s). An audit is performed in term of Section 34 of EIA of EIA Regulations, 2014 (as amended) and against an EA, Waste Management License or WULA.

WATER MONITORING BY ECO

Water Monitoring is managed by EAPASA registered supervisors and conducted by a qualified ECO. This service is an added benefit to our ECO monitoring duties.

RECENT SUCCESSFUL AUTHORIZATIONS

This quarter, Hanslab achieved several Authorisations. These include the developments of: Bulk water pipelines, Roads and Cemetery establishments.

WOMEN IN STEM

Due to the poor statistics of girls pursuing careers in STEM (Science, Technology Engineering & Maths) – this Women's Day 2021, Hanslab donated several STEM starter packs to the Grade 9 girls at a local school to encourage more women pursuing STEM careers.

NEW PROJECTS

Mandeni Cemetery

The project relates to the development of a cemetery in Mandeni, KwaZulu-Natal. An application for an Environmental Authorisation is currently being undertaken by Hanslab Environmental Consultants.

MAIN ROAD UPGRADE ENVIRONMENTAL COMPLIANCE MONITORING

Hanslab conducts monthly ECO audits for the Gravel to Blacktop Road Upgrade located in the Estcourt Region.

MAKHOBHA CEMETERY

The Greater Kokstad Municipality (GKM) proposes to develop a 1.9ha cemetery within the Makhoba Community. The Makhoba community has been established to meet the need for housing and associated infrastructure, including the need for a cemetery.
